

General

→ All the form fields are not saved when I pressed back, so for example this I-94 for example should have been uploaded but the UI shows nothing to me. So make sure all the fields are being saved and when I pressed back, they are not supposed to be empty.

The screenshot shows a web form titled "Let's check your eligibility". At the top, there is a progress bar with a green segment on the left and a yellow segment on the right. Below the title, there is a "Tax year" dropdown menu currently set to "2025". A note below the dropdown states: "Only 2025 is supported right now — back-filing for earlier years isn't available yet." There are two large, rounded rectangular upload areas. The first is titled "I-94" and contains the text "Your I-94 arrival/departure record" and "Click or drag a PDF here". The second is titled "I-94 travel history" and contains the text "Your full travel history from i94.cbp.dhs.gov" and "Click or drag a PDF here". At the bottom of the form, there are two buttons: a light gray "← Back" button and a green "Continue" button.

1. Just fix the general, make upload UI different if its already uploaded even through pressed back from the other page.

Tell us about yourself

US address

Street address

CityStateZIP

Foreign (home country) address

State/province (optional)Postal codeCountry

Filing status

single

Do you have a Social Security Number (SSN)?

☒ Yes ☐ No

Social Security Number

123-45-6789

Did you receive, sell, or exchange any digital assets (crypto) this year?

Required on every return regardless of amount — includes receiving, selling, trading, or being paid in crypto. This is different from selling investments for a gain, which we'll ask about next.

☐ Yes ☒ No

Have you filed a US tax return before?

☐ Yes ☒ No

1. You also did not saved this one, you can basically just take all the data from the database if it is available (supabase).
2. For the filing status, i dont see married option (but this must be written as beta or not available)
3. For the Have you filed the US Tax return, make the default to be yes, and default the year to the current tax year -1.

A few questions about your year

Did you work in the US this year (on-campus, CPT, or OPT)?

☐ Yes ☒ No

Did you receive a scholarship or fellowship?

☒ No

☐ Yes, it covered tuition only

☐ Yes, it covered tuition & living expenses

Did you earn any interest, dividends, or investment income in the US?

This is about income from investments, separate from the digital-assets question you already answered — check any that apply and we'll request the matching tax form.

☐ Bank interest (savings, CDs, high-yield accounts)

☐ Dividends

☐ Sold stocks, crypto, or other assets (for a gain or loss)

1. Remember the general too (take data from supabase when I clicked back)

Upload your documents

Your I-94 confirms your visa status and entry history — already on file. Your travel history is what let us confirm the five-year rule — already on file. Your I-20 confirms your school and SEVIS enrollment details — every F-1 filer needs one on file. You told us you earned bank interest, so we need your 1099-INT. You told us you earned dividends, so we need your 1099-DIV. You told us you sold stocks, crypto, or other assets, so we need your 1099-B.

1. I am so confuse with what you are trying to do with I-20, for now please just remove the extract I-20. Those files will later be extracted in the system to build the output, you dont need to confirm those data with the students for now. (accuracy will not the main goal for now). So for this page just remoe the button extract I-20. The function will be used later. Not for this prompt.

Let's discuss.
