

For sign in / Sign up, I'd love to change to this kind of UI.

So I don't need the welcome page, what I need you to change is only the layout.

So, sign in, sign up, forgot pass is still going to be the same (change the UI, but keep the functionality the same).

For the background, I will give you a file JPEG in the root folder as a template. Name will be img_1.jpeg

I want the wordings on the right side to be

→ “For International Student who wants to maximize deduction and fast prep” → make it better

→ File in 10 minutes, get the most out of it. Send it to IRS with zero knowledge needed

For the UI image, can you just designed it with a template for now (make it similar to taxbuddy current UI)

If you have any question please asked

Secondly, there is a little bug.

I want the user to not be directed directly to their dashboard, if they go to “/”, cuz sometimes the user just want to see the landing page, but it auto direct to the dashboard. So fix it.

Thirdly, on the last page,

Tax year 2025

You're all set

Eligibility

Profile

Interview

Documents

Your tax return is ready

Download each form below and mail them together, or use the instructions provided.

Download entire return (all forms) ↓

Or download each form individually:

Form 1040-NR ↓

Schedule OI ↓

Form 8843 ↓

Schedule NEC ↓

Schedule NEC — Line 16 Attachment ↓

RESIDENCY SNAPSHOT

Status

F-1, nonresident

First entry

September 14, 2022

Exempt year

4 of 5

I want you to remove the download per form. Just make it into one, and I want you to embed a pdf viewer in the web, so they can see directly without downloading. (and ofc downloadable as well)

Lastly,

This part have a really bad UI, I want you to make the layout similar to below, but remember all UI changes still keep the color palette and the font the same with the other. Add three navbar button on the right side. Sign out (filled with color), Contact Us, and home (right to left). Make the image a template that I will give with the name of `img_2.jpeg` in the root folder. Please move the image to the right place. Wordins will be “let’s find your refund” – header. Then Get it ready in 10 minutes with zero knowledge on tax needed. (or something similar that makes UI great). Then add the start filing button.
